

**Alloway Township Environmental Commission
October 7, 2013 Regular Monthly Meeting**

Attendees: Chris Gilbert, Joe Ingerson-Mahar, Anne Sullivan, and Marilyn Patterson

Absent: Craig Kane, Autumn Angelus and Frank Ponti

Minutes were reviewed and approved with corrections.

We have received a letter of interpretation for Sean May Block 28 Lot 9. Atlantic City Electric has received a LURP (Land Use Regulation Permit) for their existing right-of-ways on Block 19 lots 25, 26, 26.02, 26.05, 29, and 29.01.

Joe talked about preservation of native bees. It appears that certain pesticides last longer in plants than was expected and that may be contributing to bee deaths. Certain fungicides have been found in Honey Bees.

We talked about the new “stream recycling” in the Township. Most of the information is second hand since public notice has not been made as yet.

Joe encouraged us to continue working on the Threatened and Endangered Species Report.

Meeting was adjourned.
