PRESENTATION BY TILSON TECH ON BEHALF OF VERIZON

Mayor McKelvey said a request was made by Tilson (Douglass Culp) seeking permission from the Township to install nodes in our public right-a-ways. Due to a personal emergency, Mr. Culp couldn't attend and Joshua Broder came in his place. Mayor McKelvey introduced Joshua Broder and he approached the microphone to address the Committee. Mr. Broder said Tilson is based in Clifton, NJ, but he is working with Verizon Wireless to get consent from the Township to install network antenna nodes in the Township. He stated the small nodes support cell phone data traffic, therefore, expanding networks. Mayor McKelvey asked if the company was prepared to make an offer to the Township to have access to the Townships right-a-ways and Mr. Broder said he didn't believe Verizon Wireless is offering a fee at this time. The Committee asked questions and Mr. Broder answered all of them which included the following information. Mr. Broder said the Township's building code department would approve placement and quantity of poles and nodes before anything is installed. If a pole exists, then the node would be mounted to the top, if not, a new pole would be erected. Mr. Broder explained that a node has 2 parts. It is made up of an antenna (2-3') and a box (20"x55"). He said their team will research to see where the service is low or where a lot of people gather and put a node in that area to boost performance. He said the nodes help to off load the capacity and are short range in nature. Mr. Broder presented a picture to the Committee Members. He stated the network node is high enough on the pole to avoid vandalism. He said it would not work well in a heavily wooded area and they are meant to enhance existing coverage. Mayor McKelvey asked the public if anyone had a question and Brian Crossley asked if their engineer will survey the entire Township because the Township has sparse areas and Mr. Broder answered that the entire community would be surveyed by their Radio Frequency (RF) Engineer and stated the RF design is not completed yet

for Alloway. Ben Thompson asked what the saturation point per square miles would be for placing the nodes and Mr. Broder answered that in rural areas they are relatively far apart. However in tight areas, they would be 500'-1,000' apart. There were no other questions; therefore, Mayor McKelvey thanked Mr. Broder for his presentation.

PUBLIC SESSION

Mayor McKelvey opened the public session and asked anyone to come forward with questions or comments.

Warren Wieting, 36 Cobbs Mill Road, thanked the Committee for putting his drinking water fact sheets on the website. He said he wondered why his water pressure dropped. Then when he checked the filter that comes off his well, it was covered with orange sediment. He said his filters were always clean. He believes it's the 6 " well in Quinton that is affecting all the wells. He said it is the KCA (Kirkwood-Cohansey Aquifer). He said his toilet tank is picking up an orange tint as well. He has complained to the County and now to the Township. He stated, as the Township, they may want to look at this matter. Mr. Wieting noted this is because of the KCA (Kirkwood-Cohansey Aquifer). In conclusion, Mr. Wieting then spoke about Solar Heating. He wanted to emphasize it again. He said Solar Heating is the reason why the earth (globe) is warming and it has nothing to do with CO². He referred to a chart he brought with him. He said in 1880-2000, there was an initiative at the North Pole, where there were no outside influences. He stated when solar activity increases, the earth gets warmer and when solar activity decreases, the earth gets cooler. He said it goes up and it goes down and there isn't anything that can be done about Global Warming. Mayor McKelvey thanked Mr. Wieting for his information. Committeewoman Reilly wished Mr. Wieting a happy birthday.

There being no further questions or comments, the public session was closed on motion by Patrick, seconded by Reilly.
