

Guide to Handling, Disposing, and Recycling Asbestos

Handling and Disposal

Only licensed professionals should handle and dispose of asbestos materials

- Seal off the work area
- Wear proper protective equipment
- Wet materials before removal
- Dispose of waste properly

Dangers of Disturbing Asbestos

Improper handling of asbestos can cause exposure and serious diseases such as mesothelioma, lung cancer, and asbestosis

Asbestos Recycling

Companies are working to reduce the costs of asbestos recycling methods and make them more accessible
